Display Introduction

Thanks for choosing HUION Kamvas Studio 16 pen computer.

With a built-in Windows operating system, Kamvas Studio 16 is a portable all-in-one drawing pen computer supporting both finger touch and pen touch. Kamvas Studio 16 can be used for browsing websites, playing games, and watching films as a computer offers, and at the same time can be used for writing, drawing, graphic design, and video editing as a pen display does, which makes it powerful and useful. Moreover, PS, AI, SAI, GIMP, Painter, and many other professional programs run smoothly on Kamvas Studio 16.

To better know and use this product, please read this user manual carefully.

Note: Design and specifications are subject to change without notice. The pictures in the User Manual are for reference only.

Product Overview

	Front Camera

	HLION	Integrated Stand
Speaker	HLION	Speak Rear Camera Integrated Stand

Notice: Supporting stepless angle adjustment, the kickstand can hold the device within a 30-75° angle with the desktop. The stand uses hinges to provide a limited bearing capacity, so it is only applicable to scenarios such as watching videos, playing games or browsing web pages. For drawing, please use the accompanying drawing stand.

1.Capacitive Touch

Capacitive touch, in cooperation with the electromagnetic digital pen, can greatly improve creation efficiency.

Touch gestures preset in Windows are supported. Other functions depend on whether they are supported by the software.

General Functions						
Finger	Gestures	Action				
One-finger	Тар	Select				
_	Double tap	Open the file				
	Press and hold	Show more commands (like				

) — — — — — — — — — — — — — — — — — — —
		right-clicking)
	Press and drag	Move the file
Two-finger	Slide horizontally or verticall	Scroll
	у	
	Pinch in or stretch out	Zoom out or zoom in
Three-finger	Swipe up	Show all open windows
	Swipe down	Show the desktop
	Swipe left or right	Switch between open apps
		or windows
Four-finger	Swipe up	Show all open windows
	Swipe down	Show the desktop
	Swipe left or right	Switch desktops

Notice: The touch input can be disabled in the driver.

2.Accessories

3.Stand Adjustment

This adjustable drawing stand is specially designed for your all-in-one pen computer and you can adjust it to find a comfortable angle according to your usage habit when painting and creating.

4. Charging Mode

In order to have a better experience, please use the attached power adapter to fully charge your device before first use. Then press and hold the POWER button to start it.

Driver Installation and Update

The driver has been preinstalled on Kamvas Studio 16.

The driver will be updated constantly. It is suggested to check and update the driver from our official website www.huion.com/download/ so as to ensure that the device has the latest features and functions.

Driver Interface Preview

1 Pen Comp	outer ² Digital Pen 🤱 Store	4	All Programs	< 🗅 🕸 – X
Press Key	Working Area			<u>6</u> ?
Í		8		
	touch input			
1. Pen Co	mputer	> Kamvas Studio 16		

On the "Pen Computer" interface, users can set the Working Area of the pen computer.<u>See</u> <u>Section</u>

2. Digital Pen

Users can set functions of the pen on this "Digital Pen" interface, including Press Key, Mode selection, Pressure Sensitivity Adjustment, and Pressure Test.<u>See Section</u>

3. Store

Huion Store is where you can get the latest information about the product such as its FAQ or sales promotion. In addition, you can also purchase Huion's other products or accessories here.

4. Add Programs

1. Some programs which have already been opened will appear for you to choose from after clicking Add a Program on the screen. For more programs, click Browser and choose the item that you want to get it added.

2. For different programs, the press keys, the working area and the pressure curve can be set differently. When switching from a program to another, the driver will automatically switch to the set functions accordingly.

3. When you select "All programs", the functions of press keys that you set are valid for every program. By clicking Add a Program from the drop-down list, you can set the functions for a specific program and hence have unique settings for different programs. After that, when you launch a specific program, the Driver will automatically recognize it and the setting features will change to its corresponding ones.

5. Setting

Users can set the functions of a driver on this interface, including check out Device information, Backup setting, General setting, and its version.<u>See Section</u>

6. Common Problems

Click "?" and jump to Forum in our website <u>https://support.huion.com/en/support/home</u> to get a user manual or feed back the problems to us.

7. Enable Touch Input

"Enable touch input" is checked by default. In this case, the finger touch can be used. If "Enable touch input" is unchecked, the finger touch is disabled. In this case, touch input can only be realized by the digital pen. Pen Computer Setting

Select the Working Area tab to adjust the ratio of the distance of pen movement on the pen computer to that of the corresponding cursor movement on the monitor. By default, the entire active area of the pen computer maps to the whole monitor.

1. Working Area Setting

Define the pen computer area that will be mapped to the monitor. Three modes on the driver can be chosen:

[1] Full Area: The entire active area of the pen computer will be mapped to the monitor. It is the default setting.

[2] Screen Ratio: The ratio of the active pen computer area depends on that of the display device. In Screen Ratio mode, these two ratios keep the same. For example, if you choose the screen ratio and draw a circle on the pen computer, then a circle appears on the monitor that has been connected to the pen computer, in this case, some parts of the screen of the pen computer may not work. But if you don't choose the screen ratio and draw a circle, then the circle may change into an oval on the monitor.

[3] Custom Area:

1> Enter coordinate values.

2> Users can adjust the working area of the pen computer by changing the outlines of the smaller rectangle. Users can also drag the two blue rectangles to select the active areas of the digital pen on the screen and the pen computer. (see picture 1 and 2).

Picture 1

2

2. Rotate Working Area

Both left-handed and right-handed users can freely use the pen computer because it can be rotated by 0°, 90°, 180° or 270°.

3. Calibrate Your Pen Display

Click Monitor Calibration tab and follow the instructions to calibrate your pen display.

Please use the digital pen to click on the center red dot of the cross in a common pen-holding posture. You can cancel Calibration and restore default.

Digital Pen Setting

1. Press Key

You can use this digital pen to interact with your device, including drawing, writing, moving files, or activating the functions of pen press keys.

Pen Computer D	igital Pen Store		All Programs	< 🖸 🕸 – X
Press Key	Pressure Sensitivity Adjustme Enter a Name for the Key Keyboard Key Mouse Key Switch Run Program System Application Multimedia Precision Mode Pan/Scroll	stroke Mouse Left Button Mouse Right Button Mouse Middle Butto Double-Left Click Wheel Forward Wheel Backward	☐ Ctrl ☐ Alt ☐ Shift ☐ Win	?
✓ Enable Windows ink		0		
	> Kar	mvas Studio 16		

Refer to this table of settings below to help you decide if you want to change the existing settings.

Note: The performance of functions in the table below is up to the device that you have connected. And this table is subject to change without notice.

The settings of the press keys' functions can be found in the following list. The functions of the press keys can be set as:

Keyboard Key	Click on the input box above and enter a valid key combination to create a shortcut.
Mouse Key	Select the functions of a Mouse or Wheel. Mouse: Mouse Left Button, Mouse Right Button, Mouse Middle Button, and Double-left Click. Wheel: Wheel Forward and Wheel Backward. Other functions: Ctrl, Alt, Shift, and Win.
Switch	Select between Switch Screen, Switch Brush, Mouse Mode On/Off, and Game Mode On/Off.
Run Program	Click Browse and select the program that you want to run quickly. After that, press the key to launch the item.
System Application	You can apply these functions to press keys: Lock the Screen, Sleep, Power Off, Show/Hide Desktop, Task View, Start Menu, and Calculator.
Multimedia	You can apply these functions to press keys: Previous Song, Next Song, Play/Pause,Volume up, Volume down, and Muted.
Precision Mode	You can toggle between normal precision and a precision that you

	choose, from Fine to Ultra Fine. In the Precision Mode window that appears, move the slider to set the precision that you toggle into. For example, if you assign Precision Mode to a pen button, when you press the pen button, you switch to working in the precision that you selected from the slider. When you press the pen button again, you switch back to working in the normal precision. Press "Esc" or press the pen button for the third time to exit Precision Mode.
Pan/Scroll	This function allows you to pan and scroll in a document or item by moving the pen tip up and down or right and left.When you select Pan/Scroll, the Scroll Speed window appears. Move the slider to your preferred scrolling speed.
Quick Menu	Pick it up and you can use the key to pull up the Quick Menu. Detailed information for reference is down below this table.
Fixed Pressure Sensitivity	You can lock the pressure at the current level until you release the component. For example, if you assign this setting to a pen button, you can paint with pressure sensitivity enabled in your application until you reach the brush size you like. Then, press and hold the pen button to lock in that brush size as long as you are pressing and holding the button.
None	When select None, the keys will not work.

Note: The pictures are for reference only. The specific settings of the Quick Menu are as follows:

	o 1114
Run Program	Quick Menu
 System Application 	
 Multimedia 	Different quick menus for different a
O Precision Mode	
O Pan/Scroll	Customize
Quick Menu	
 Fixed pressure sensi 	
○ None	

Click Customize in the picture above to call out a quick menu (see picture 1). For each of the six buttons on the left, users can enter a name for it and set unique function for it. After that, users can call up the Quick Menu by pressing the key (see picture 2). The menu disappears after a click on any of the six buttons. By clicking "Fix" once the menu will be fixed on the desktop while after a second try the "Fix" button changes to "Close" and the menu disappears (see picture 3). Put the cursor on the menu to drag it.

Picture 1

Picture 2

Picture 3

2. Pen Nib Activity

The pen nib of the digital pen can be set as Valid/Invalid according to users' needs. Click the drop-down button to set its activity. In Valid mode, the pen works well, and in Invalid mode, the pen has a cursor movement, but cannot complete specified actions.

3. Enable Windows ink

Microsoft Windows provides extensive support for pen input. Pen features are supported in such as Microsoft Office, Windows Whiteboard, Adobe Photoshop CC, SketchBook 6 and so on.

4. Pressure Sensitivity Adjustment

Users can adjust the pressure sensitivity level by dragging the slider in the Pressure Sensitivity Adjustment box according to your usage habits. Click the redo button at the top right to revert to the default pressure.

(1)To decide the force required for a pen to produce a click or a pressure sensation.

(2)You can change the slope of the pressure response curve.

(3)To determine how much pressure needs to be applied to the pen nib to reach the highest pressure sensitivity level.

*Draw lines in the Pressure Test box with the pen, and the bar on the right will simultaneously show the pressure changes on the pen nib. Click the "Delete" button above to remove the lines, reset the pressure sensitivity level and test it until you find the appropriate pressure sensitivity level.

*A steep curve means a more sensitive response.

How to Use the Digital Pen

Hold the Pen:

Hold the digital pen as you hold a real pen. Adjust your grip so that you can toggle the pen press keys easily with your thumb or index finger. Be careful not to accidentally press the key while drawing with the pen.

Note: Please place the pen on the table when it is not in use. Do not put the pen on the pen computer, otherwise it may interfere with the function of the mouse and other devices, and it may also prevent your computer from entering sleep mode.

Cursor Movement:

Move the pen slightly above the working area of the pen computer without touching the surface of the pen computer, and the cursor on the screen will move to the new position accordingly.

Click:

Tap on the working area of the pen computer with the pen to register a click. Press lightly to

highlight or select an item on the screen and double-click to open it.

Move:

Pick up a file or icon, then slide the pen nib across the display to move it.

Use the Pen Press Keys:

There are two press keys on the digital pen. Their functions can be programmed in the driver. The pen press keys will work as long as the vertical distance between the pen nib and the pen computer is within the sensing height(10mm).

Replace the Pen Nib:

Tip: When the pen nib is badly worn, please replace it with a new pen nib timely.

1.Unscrew the top of the pen case counterclockwise to open it

2.Take out a replacement nib

3.Pull and open the pen case

4. Tilt the pen, and pull the nib out of the pen through the nib clip

5. Insert the replacement nib straight into the barrel of the pen until the nib stops moving forward

Troubleshooting Solutions Pen Computer Troubleshooting

Problems	Solutions
There is no picture on the screen	Check whether the power has been turned on and whether the
	indicator light is on.
The pen touch does not respond	1. Check whether the driver has been successfully installed. Try
	to reinstall the driver and restart.
	2. Check whether the digital pen nib is set as "enabled". If not,
	please reset it as "enabled".
1	

It takes too long for the pen touch to respond	1. The CPU is occupied by programs or too many processes are running. Try to close applications which are not used temporarily.
	2. There is debris on the screen which affects the operation. Try to clean the screen of the pen computer.
Color deviation	As color temperature varies for different areas, tiny color deviation is a normal phenomenon.
Image dithering or ripple	Check whether there is any electronic device nearby that interferes with the pen computer.
Image blur	Please set the screen resolution to the default setting.
